New Method of Arranging a Lending Library.

NOTE.—These illustrations, drawn by Mr. Beresford Pite, F.R.I.B.A., of 20, Hanover Square, are explained in the September number of THE LIBRARY (pages 263-265).

The height of the cases could be increased by two shelves by placing a step round the outside. With this additional accommodation the library would be able to contain over 17,000 volumes.
